 - a)Arman
 - b)Gourav Kumar
 - c)Mohd Asheer
 - d)Prateek Sharma

Problem Statement

- **Inefficient Management**

- Organizers still rely on spreadsheets, offline payments, and manual attendee tracking.

- **Limited Event Discovery**

- Attendees miss events due to no centralized platform; discovery is scattered across social media/word-of-mouth.

- **Rigid Ticketing & Payments**

- Existing systems lack flexible ticket types, refunds, and smooth digital payment options.

- **Low Attendee Engagement**

- No timely reminders, updates, or smooth check-in, leading to poor experience.

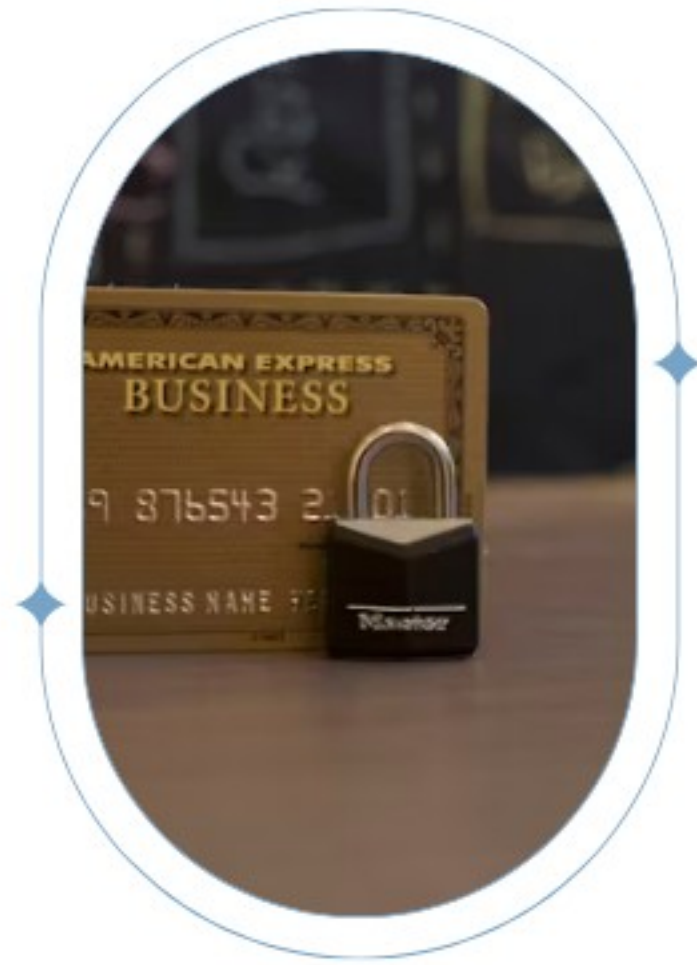

- **No Data Insights**

- Organizers cannot analyze sales, revenue, or attendee demographics effectively.

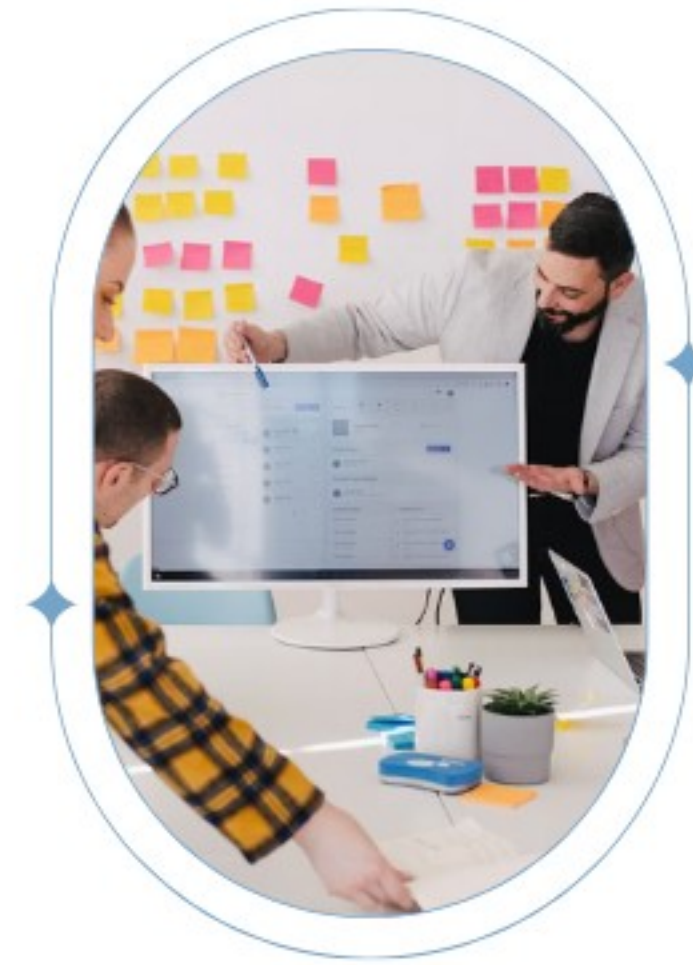

Proposed Solution

Smooth Experience:
QR/Barcode tickets, instant delivery, and reminders.

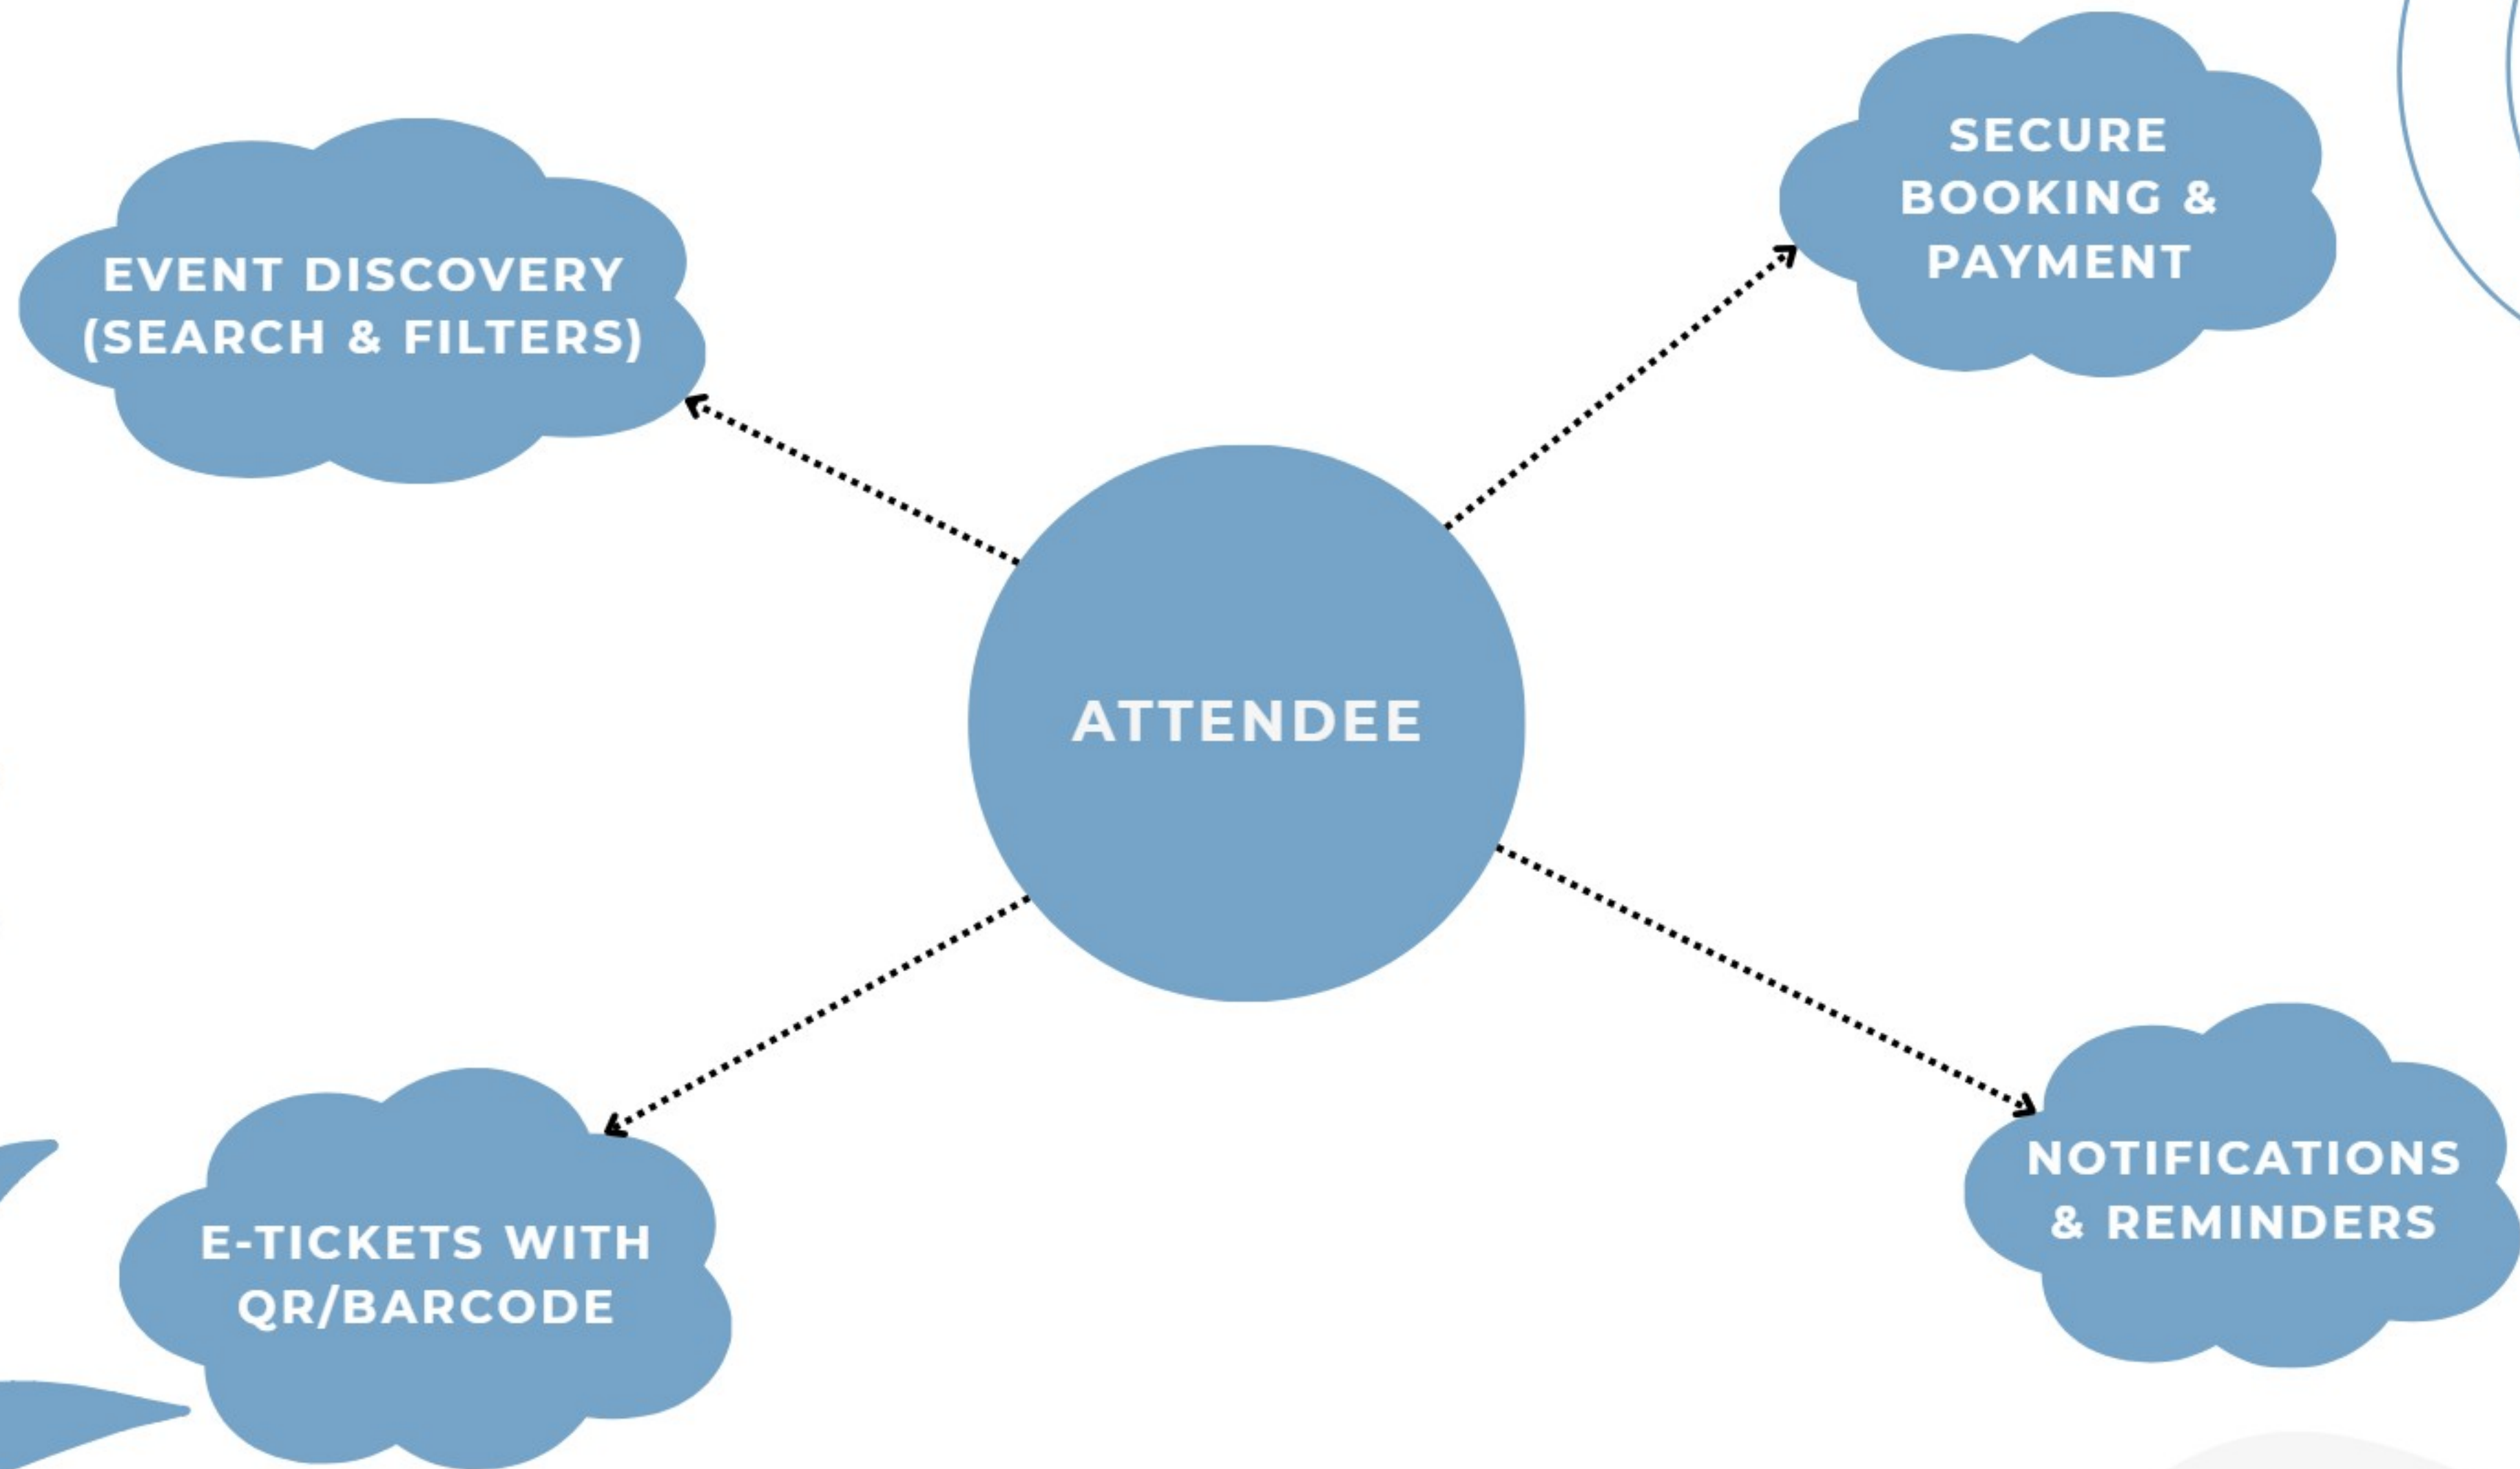

Flexible Ticketing & Payments :
Multiple ticket types with secure digital payments.

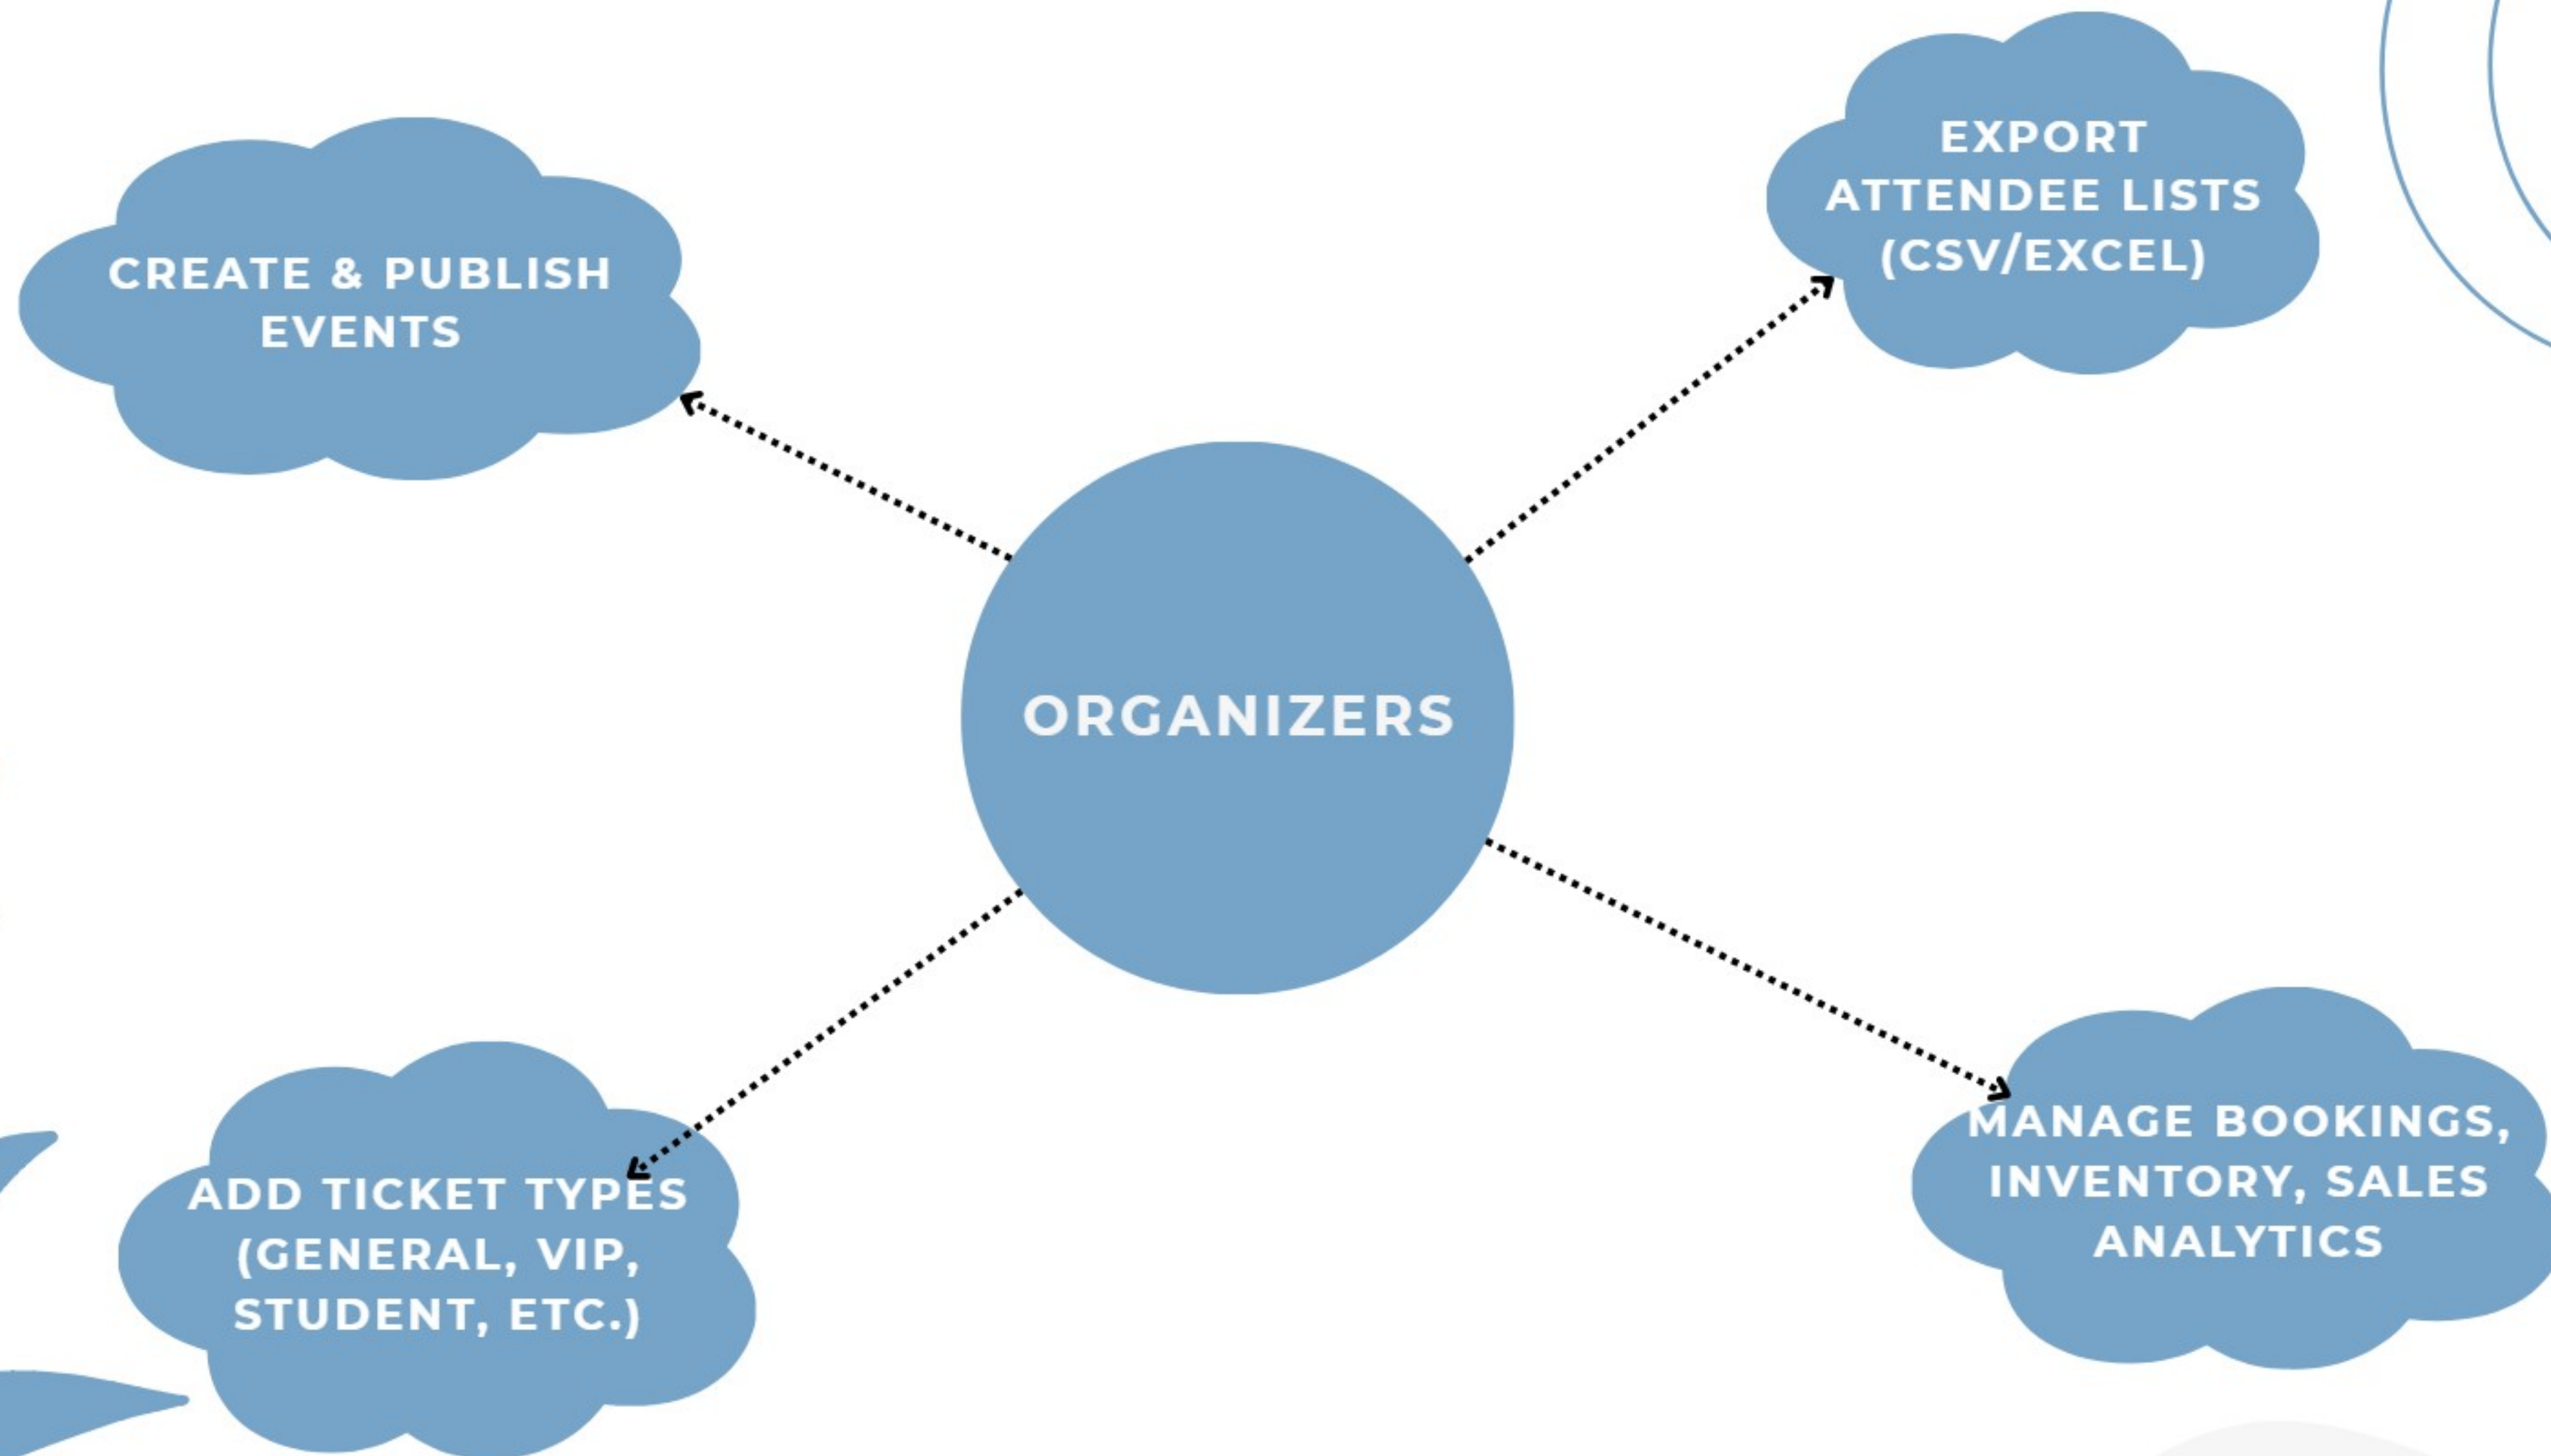

All-in-One Platform :
Organizers create/manage events, attendees discover & book easily.

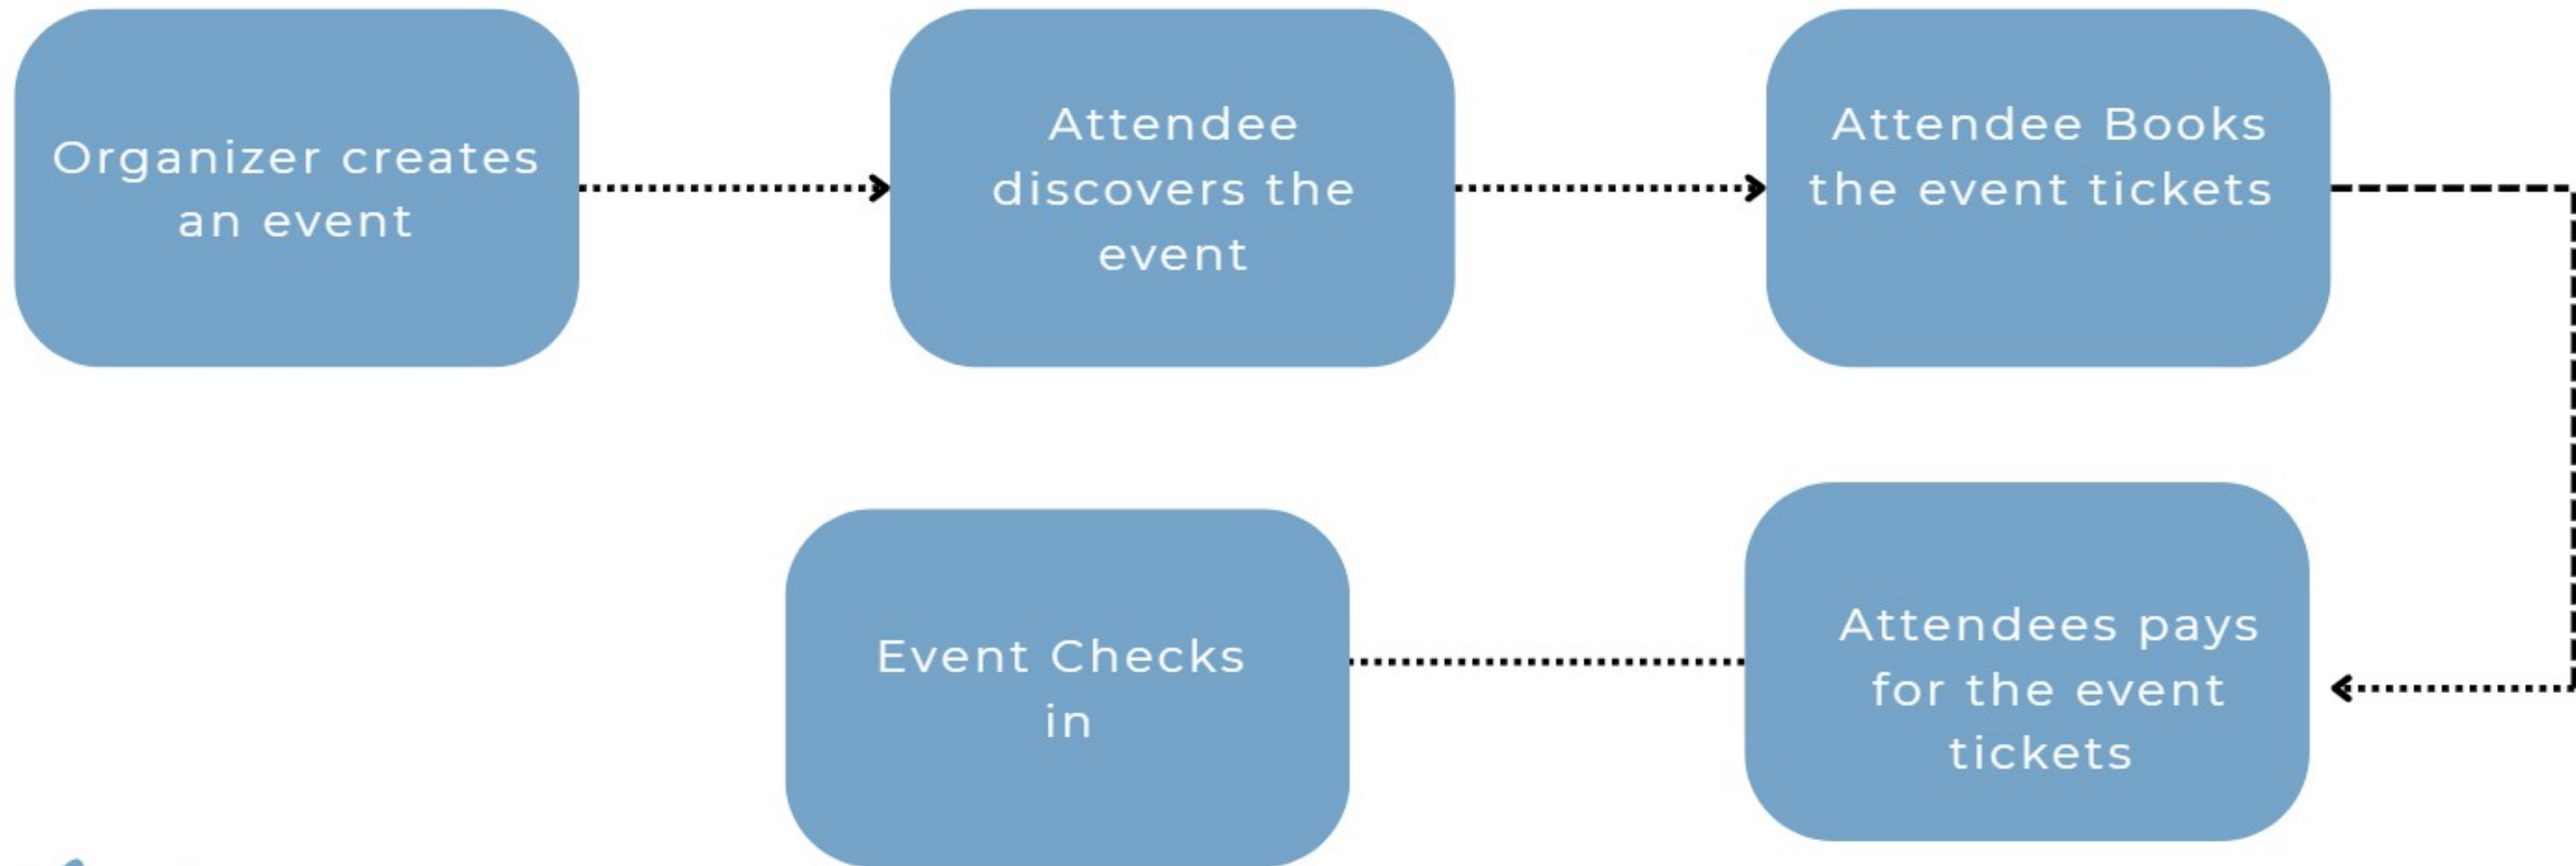

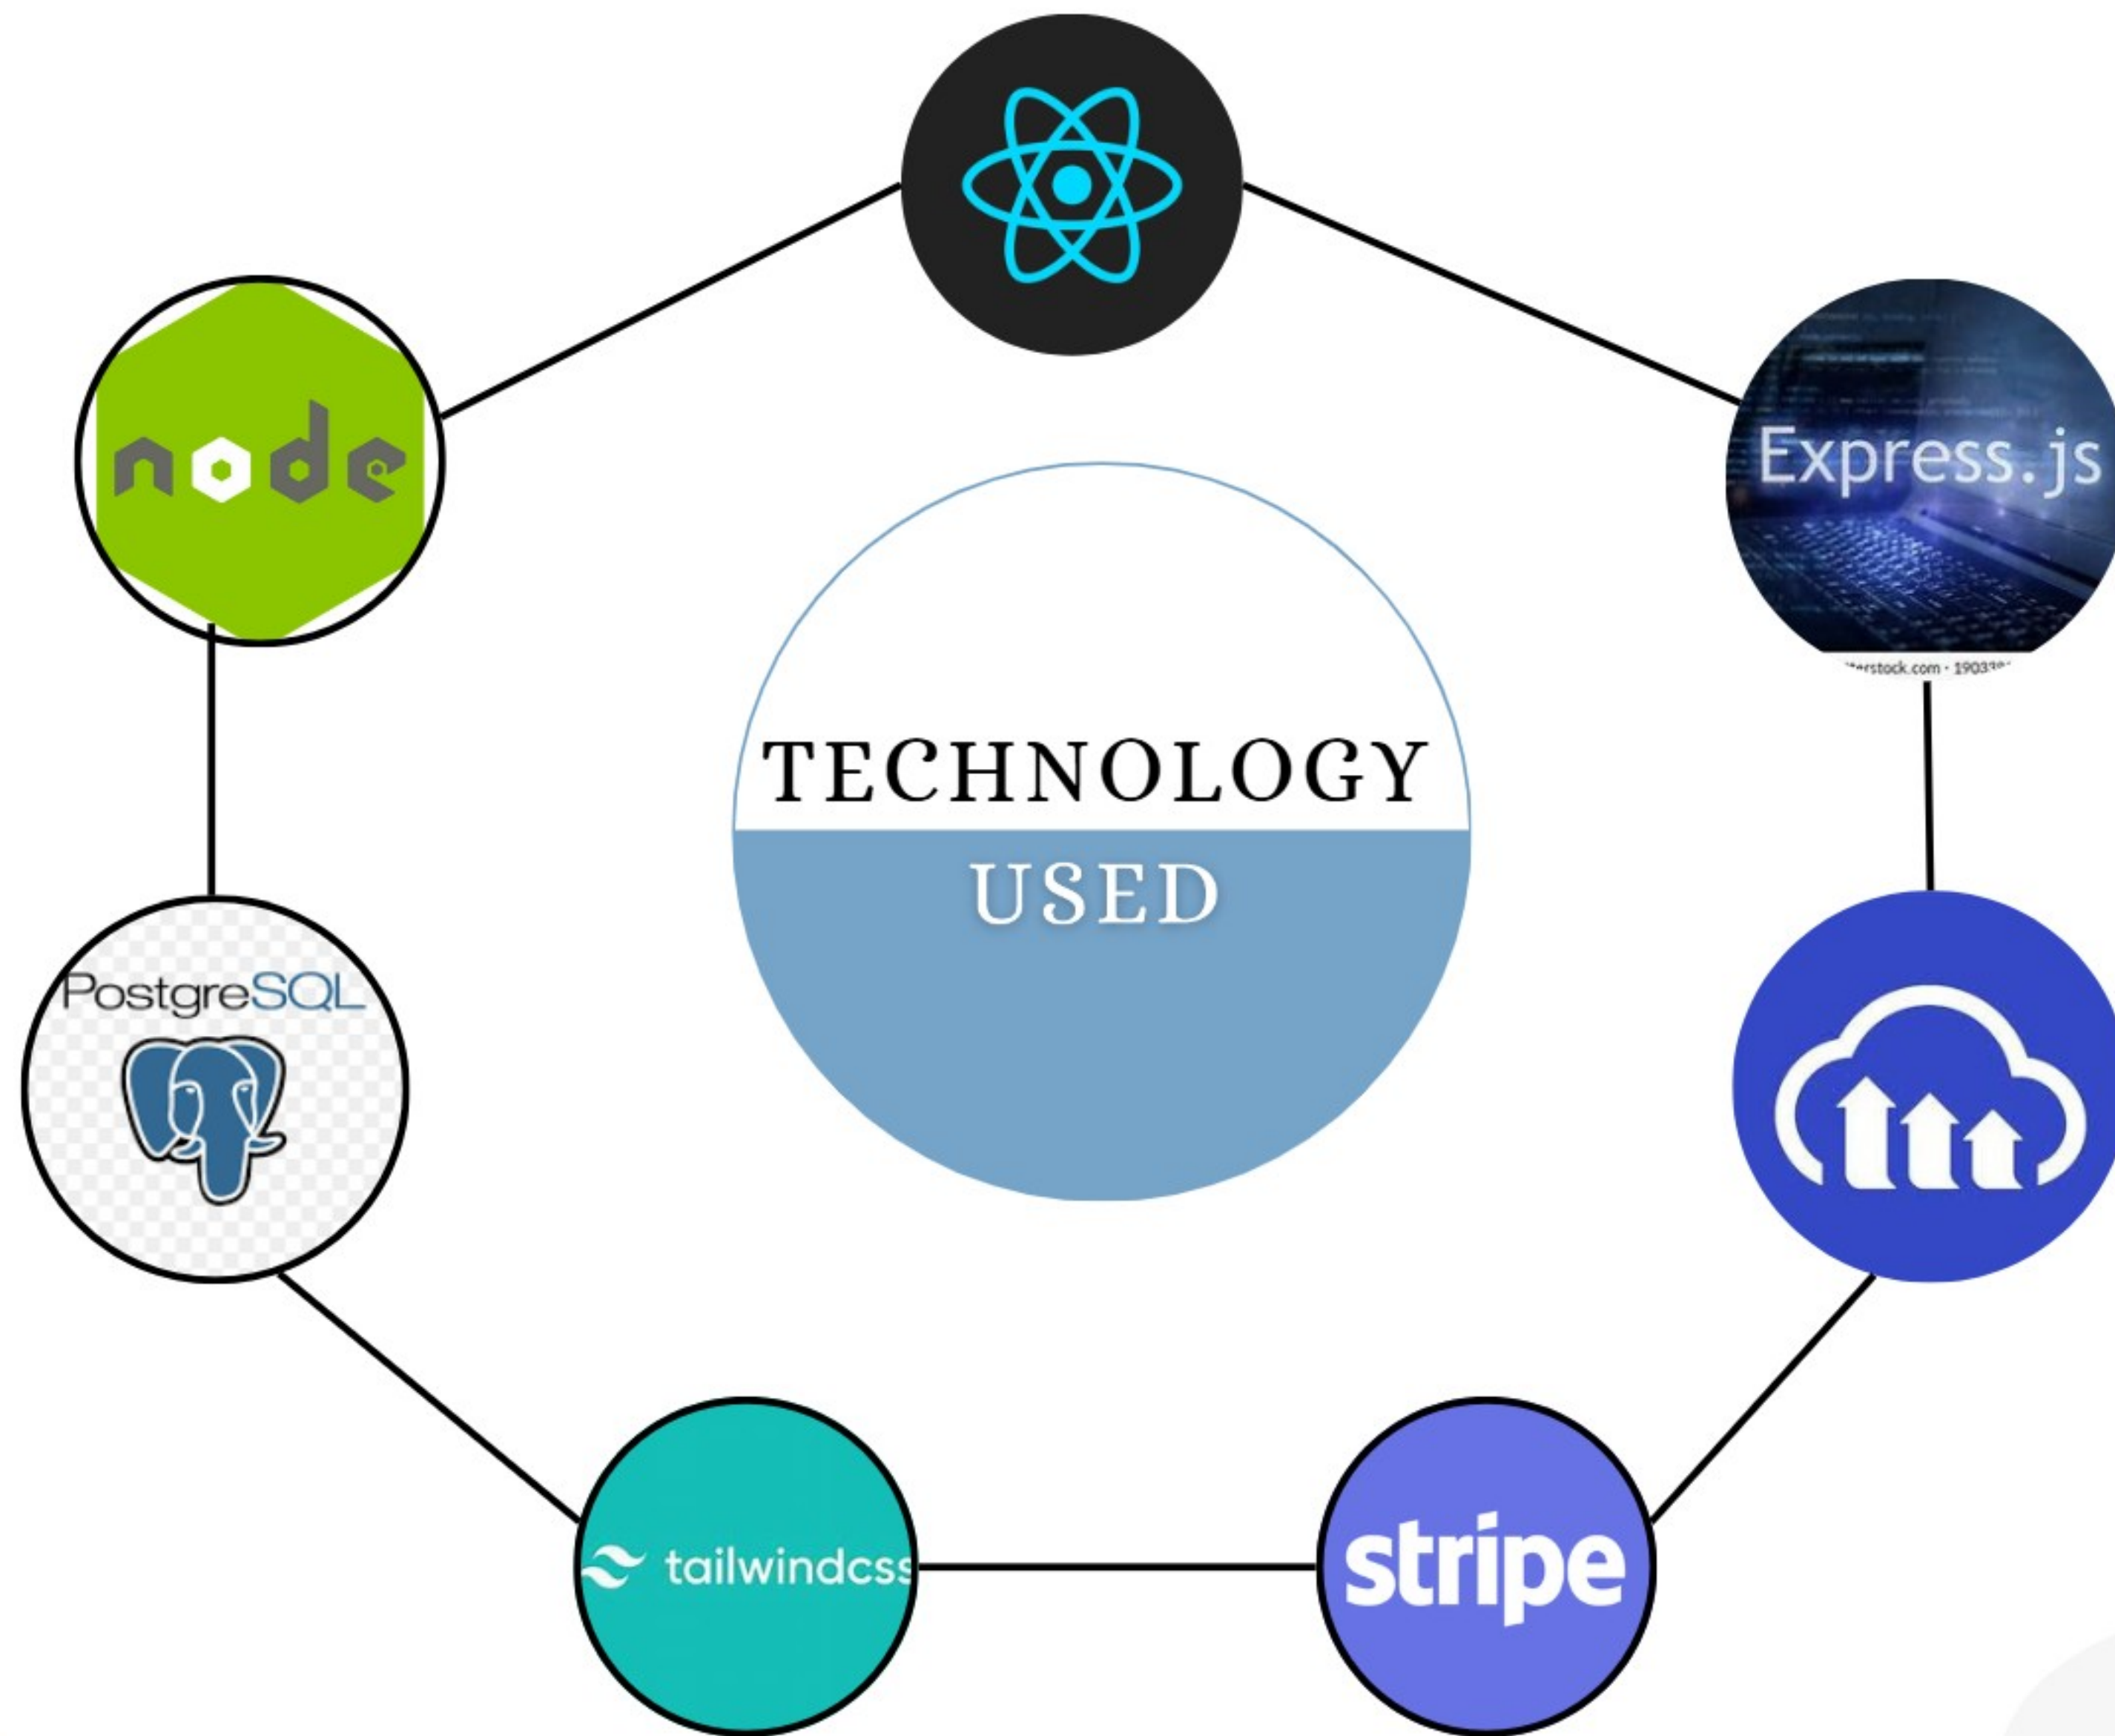

Smart Discovery:
Search & filter by category, location, and trending events.
